

Loading Device 230 Projectile

Reloads 3,2mm line into the 230 projectile

[Article 2200](#) [Loading Device Projectile Rescue 230](#)

1

The Loading device is for reloading a clean and dry 3,2mm line back into the R 230 Projectile.
Comes with couplings to fit compressed air systems of 5-10 bars (72-145psi).

Operation

The loading device uses compressed air to reload the line back into the 230 projectile. Restech has instructional video on how to do so.
