

# R 230 Projectile

The R 230 projectile meets the Solas 74 requirements. It does not have an expiry date, is not dangerous goods and re-usable. The line is stored inside the projectile.

Article 2101	PLT Rescue 230 Projectile	1
Made from ABS plastic and aluminum. The line is stored inside the projectile. Typical shooting range with a dry and clean line of 3,2mm (Art No 2103): 230m		
Breaking strength of the line: 2000N (204kg).		

## Operations

The PLT R 230 projectile is also used in long range mooring operations, such as FPSO loading operations. Due to its preciseness, it makes a very cost effective alternative for loading operations. If necessary you can also have a different type of line
