	Linebox containing line art no 6109, polypropylene (120m). Breaking strength 350kg. Floats and has a very bright yellow color.	
	User Manual and USB stick included	

Operations

The PLT Rescue 230 meets the IMO Solas regulation 74. You can launch 6 times without refilling the air cylinder. The minimum launching distance is 230 meters.

Due to its high precision, the PLT R 230 is also used on FPSO/FSO for long range line transfer during loading operations. This provides a safety zone up to 160 meters. All parts are re-useable
