

Launching Tube PLT® 75

Used to launch the rubber ball.

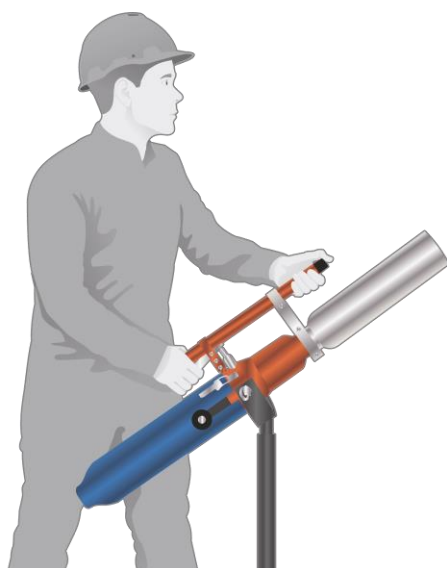

Article 6303 Launching Tube PLT® 75

1

Launching Tube for Art. No. 6101 Projectile Ball.
Typical launching distance with a dry and clean line of
5mm (Art. No. 6109): 90m.

The classic mooring projectile made of rubber that is used with the PLT® 75 Launching Tube and often a 5mm line.

It is ideal for launching on deck or on land, such as a harbour. It is filled with water to avoid bouncing around. The projectile can use different types of lines.

Operations

Heaving line for mooring ropes during
STS operations
Heaving line during towing operations
Heaving line during mooring vessel to port
Used by some terminals to transfer
mooring rope
